ULTRA-WATERPROOF  
Collection

**The Solar protection fabric for all weather, enjoy your outdoor space all year round**

**MAX** differs from Orchestra due to its transparent coating on one side, which gives it its excellent water resistance. The acrylic fibres, meanwhile, ensure that the fabric's colours stay bold over time and provide protection against UV rays.

**AN INNOVATIVE TREATMENT FOR REALLY EASY MAINTENANCE**

**MAX** has undergone a water-repellent treatment developed by Dickson. This innovative treatment, which covers the entire surface of the fabric, means it's really easy to maintain: rain or a simple rinse with water helps to clean the fabric every day, making it possible to space out more thorough maintenance sessions.
