VARIO PERGOLA
SELF SUPPORTING SUNROOF

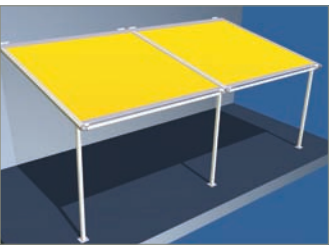
Where there is not an existing pergola or other structure for shading courtyards, decks, and outdoor living areas, why not create an outdoor room with this clever new sun control solution.

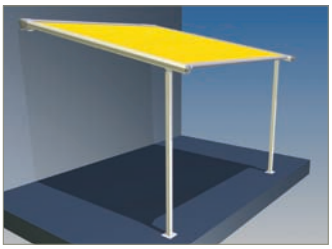
The Vario-Pergola self-supporting sunroof adds a new dimension to the Helioscreen outdoor living range. The Vario-Pergola is suitable for a wide variety of applications and is more flexible than traditional conservatory or winter garden awning products. It can be installed using wall or ceiling brackets and doesn't require a classical substructure, as it supports itself on 60x60mm square front posts.

Lightweight but robust, the Vario-Pergola is based on the popular Varioscreen® system and comes with in-built water gutters on the side channels allowing outdoor areas to be utilised in light rain (min 14 degrees fall required).

Available in Helio 93, Helio 86, or Helioshade 100 Fabric ranges, the Vario-Pergola is an attractive addition to any building and extends your outdoor living space – all year round.



Coupled units



Single unit
